

## SCROLLING BANNER SET-UP INSTRUCTIONS

1. Remove unit from bag, assemble 3-piece poles and insert poles into base unit as shown.

2. Insert bottom roller bar through your banner panel loop, and install bottom roller into the base unit.

**Note** how the keyhole side of the bottom roller mates with the key-shaped gear.

3. The other side of the bottom roller bar mates with a spring-loaded pin. You must compress this spring to install the bottom roller.

4. Pass the top roller bar through the loop of your banner panel, and install the top roller bar into the top roller bar housing by repeating step #3 with the top roller bar.

5. Mount the top roller bar housing to the black plastic tips at the tops of the poles as shown. Black tips should be pushed as far to the edges of the top roller bar as possible (approx. 3" from the edge).

6. Install the aluminum spacer bar over the bottom roller as shown.

7. Plug transformer into to the rear of the base unit. Set-up is complete
